Banepa, Kavrepalanchwok 📍
977-9863022844 📞

Motivated and detail-oriented, result-driven Flutter Developer with expertise in Dart and Flutter for building high-performance cross-platform mobile applications with the utilization of state management techniques like Provider. Strong backend development experience using Python, Django, and Django REST Framework (DRF), with proficiency in database management (MySQL, PostgresSQL). Skilled in Firebase for real-time features, authentication, and push notifications.

Additional expertise in frontend technologies (HTML, CSS, JavaScript) and PHP for full-stack flexibility. Experienced in version control with Git & GitHub and deploying applications via cPanel. Passionate about developing scalable, secure, and user-centric applications with a keen eye for optimization and clean code practices.

EDUCATION

Higher Secondary   Banepa

Banepa NIST School (NEB)   Sep, 2020 - Jun, 2022

Bachelor of Computer Application (BCA)   Banepa

NIST College (TU)   Dec, 2022 - Present

PROJECTS

Assignment Management App (Full Stack School App)

A role-based school app supporting assignments and notices CRUD with secure authentication using JWT and state management using Provider. It also includes Firebase Cloud Messaging for notification on successful addition of notices and assignments.

Used Django and Django Rest Framework (DRF) for implementation of backend logic, authentication and authorization, notification automation.

https://github.com/sijalneupane/assignment_provider_app

Online Election System (Digital Matadan Pranali)

Developed a web based voting system for online elections with voter registration, admin review and verification, sending either voterId on successful approval or failed message on decline of registration. It includes login, candidate addition, voting and results managements.

https://sjnp.tech

Car Rental System

Developed using Flutter and Firebase ,it is a mobile application for booking cars with user login, profile, car details, and booking features.

Implements firebase authentication method like phoneauth and google login and database like firestore to store data in firebase. Cloudinary is used as tool to store the cars images.

ACHIEVEMENTS

Developed and Deployed Online Election System

Developed an Online Voting System named "Digital Matadan Pranali" using HTML, CSS, JS and PHP + MySQL along with PHPMailmaster and abstract API integration as a university-level project and deployed in infinityFree.

Firebase Noti cations Implementations

Integrated real-time Firebase notifications into apps using Flutter, Firebase and Django + DRF.

TRAINING/CERTIFICATIONS

Flutter Professional Course   2025

Next Step, Banepa

Learned about Dart, Flutter, Firebase integration, APIs integration with authentication and authorization from instructor having 5+ years of working and teaching experience about Flutter and Java/Springboot.

SKILLS

- **Programming Languages**: Python, Dart, JavaScript, PHP
- **Frameworks & Libraries and Tools**: Django, Django REST Framework (DRF), Flutter, Firebase,
- **Databases**: MySQL, PostgreSQL
- **Web Technologies**: HTML, CSS, JavaScript
- **Version Control & Tools**: Git, GitHub, cPanel
